Health is a very personal and sensitive issue for all of us. I appreciate your trust and confidence. I too struggle to make the best health choices. I know how hard it is to try and not see results, or perhaps experience painful side-effects. Please feel a sense of security, safety, and refreshed hope, because there are new natural and safe remedies that are proving to be highly effective. Not only that, in most cases they are fairly easy to implement.

My goal is to give you your health freedom so that you can have the lifestyle you want without being dependent on drugs.

Thank you for your business.

To your health,

We have finally found an office space, we will be moved in and serving patients there starting on November 6, 2007. The address is 1192 West Sunset Blvd. St. George Utah 84770. ### 2. Does insurance cover the visit?

Our office does not work with insurance companies directly. This is a cash practice. We do encourage our patients to use Med-One Medical services to bill your insurance company for you. If your insurance pays, Med-One will make it happen for you for just \$10 per claim. Many insurance companies offer some reimbursement for prevention, but typically provide more reimbursement if you are already in a diseased state. Please contact Med-One directly for insurance related questions: (480)924-5416. Their fax is (480)609-3915. Attached is their contract.

This is a cash practice. We appreciate **personal checks**. **Credit cards** are also accepted. Payment is due on the day of the visit or service. There is a \$20 returned check fee.

#### 4. **How much should I should I budget?**

Many patients prefer the discount package which is \$125 per hour in 15 minute increments. We usually have 45 min. appointments. We set our prices at 10% below suggested retail for most supplements and labs. We will match any price from local health food stores.

#### 5. **Do you offer low-income discounts?**

We have several patients in the low income category who offer to exchange services. Usually, we can find a way to make a win-win agreement.

#### 6. **We welcome referrals.**

We appreciate referrals. We typically send two movie passes for new patients that you refer. The only way to grow a business like this is word of mouth. Thank you. Another way you can help us grow our business is by writing a testimonial. We keep a binder of testimonials. It helps others who are considering naturopathic medicine.

#### 7. **What is Dr. Doughty's background?**

Naturopathic medicine is a state-licensed profession. It carries with it most of the same education, rights and responsibilities of traditional medical doctors. It requires a 4-year medical degree and a year of residency. Dr. Doughty earned his PhD in Naturopathic Medicine from Southwest College of Naturopathic Medicine. He served his residency in "Endocrinology and Naturopathic Medicine" at Arizona Advanced Medicine under Dr. Konrad Kail, former AANP President. Dr. Doughty specializes in holistic treatments of mind and body using a combination of counseling and IV therapy with diet and lifestyle coaching.

#### 8. **What is your return policy?**

Any product in good condition can be returned within two weeks. Good condition means "seal not broken", nor baked in a hot car. Unsealed products may NOT be returned. In the event that a product or service causes no effect or an adverse affect, you are **still responsible** to pay for the product or service.

#### 9. **What if I miss my appointment?**

We have no fee for missing appointments. Please be considerate and cancel appointments at least 24 hours in advance so that we may offer that time slot to others who may be on the waiting list.

## AGREEMENT TO PARTICIPATE IN RESEARCH

### Electrodermal Screening and Measurement

Participant's Name \_\_\_\_\_

Number \_\_\_\_\_

Doctor's Name : Dr. Steve Doughty

Date \_\_\_\_\_

Electrodermal screening measures the conductance of electricity (energy) through specific acupuncture points located on the hands and feet. A computerized recording device, the Computronix System, uses software to collect information about the functional, energetic status of the body based on reference point measurements. This "new device" technology is considered investigational and to be used at this time for research purposes.

Screening sessions last for 20 minutes to an hour, depending on how many points are measured. Skin measurement is obtained with a metallic probe applied to areas of high conductivity (acupuncture points). Pressure is applied and a small amount of current, 6-12 micro amps, enters through the skin. A recording is then taken on the response of the meridian (energy pathway) to these micro currents. There may be discomfort at some areas of testing for some individuals, depending on variances in stresses and pain thresholds. Skin irritation or redness may occur at the electrode placement sites.

Confidentiality regarding all test results is strictly adhered to with identification numbers, not name, used for any identification purposes. Participants may voluntarily withdraw from the study at any time. The benefits to humanity from participation include gaining a better understanding of energetic diagnosis and treatment, based on an international, multidisciplinary perspective.

Although the chance of adverse effects are small, I understand that if I am injured in the course of this research procedure, that I, alone, may be responsible for the costs of treating my injuries. I understand that I may be responsible for the costs of tests, procedures or medications that are solely part of the research project.

I certify that I have been told of the possible risks involved in this project, that I have been given satisfactory answers to my inquiries concerning project procedures and other matters and that I have been advised that I am free to withdraw my consent and to discontinue participation at any time without prejudice.
